

***Teledyne Instruments - Test Services Named Exclusive North American Distributor of the IAC/Nippon Gear Instrumented Springpack Sensor***

**The Instrumented Springpack Sensor**

- Is a one-for-one replacement of the original Limitorque™ springpack
- Is an integral part of the actuator and is sealed and environmentally protected
- Provides actuator torque information
- Is compatible with all existing MOV diagnostic and testing systems
- Has excellent reliability, accuracy, and repeatability

*Basic MOV design with torque sensor*
